

FASHOLA TOLULOPE

FULL-STACK SOFTWARE ENGINEER

Ilorin, Kwara State, Nigeria | Open to Remote / International Opportunities

fashdev@yahoo.com | +234 904 303 6911

Portfolio: fashola-portfolio.vercel.app | GitHub: github.com/fasholatolulope3 | LinkedIn: linkedin.com/in/fashola-tolulope

PROFESSIONAL SUMMARY

Full-stack Software Engineer with 3+ years building and shipping production web and mobile applications across the TypeScript/Node.js and PHP/Laravel ecosystems. Architected and delivered a fintech remittance platform and a multi-role delivery marketplace, each pairing a shared Express API with multiple Next.js and React Native clients, and covering payment integration, KYC and compliance workflows, real-time features, and granular role-based access control. Experienced across relational and document databases, REST API design, and deployment to Vercel and Railway. B.Sc. Computer Science; IBM DevOps and Software Engineering Professional Certificate.

TECHNICAL SKILLS

Programming Languages: TypeScript, JavaScript, PHP, SQL, HTML5, CSS3

Backend: Node.js, Express, Laravel, REST API design, JWT authentication, role-based access control, WebSockets (Socket.IO), webhook handling, server-side validation

Frontend and Mobile: React, Next.js (App Router), React Native, Expo, Vue.js, Inertia.js, Tailwind CSS, shadcn/ui, Bootstrap, TanStack Query, Zustand, mobile-first development

Databases: PostgreSQL (Prisma), MongoDB (Mongoose), MySQL, relational and document schema design

Integrations and Services: Paystack payments and bulk disbursement, Twilio OTP authentication, Cloudinary, UploadThing, multer, KYC and compliance workflows

Deployment and Tooling: Vercel, Railway, Expo EAS build pipelines, Git, GitHub, npm, Composer, Agile and Scrum practices

Cloud and DevOps (certificate coursework): Docker, Kubernetes, OpenShift, CI/CD pipelines, microservices and serverless, Linux and shell scripting, monitoring and observability, application security, Python and Flask

Testing: PHPUnit (foundational), Test-Driven and Behaviour-Driven Development (TDD/BDD)

Languages: English (Fluent)

PROFESSIONAL EXPERIENCE

Full-Stack Software Engineer | Independent / Freelance

Ilorin, Nigeria · Remote and On-site Client Work · 2025 – Present

- Design, build, and deploy custom web and mobile applications for clients across multiple sectors, owning delivery end to end from database schema through to production release.
- Build backend systems in Node.js/Express/TypeScript and PHP/Laravel, implementing REST APIs, authentication, business logic, and data access layers against PostgreSQL, MongoDB, and MySQL.
- Develop responsive frontends and cross-platform mobile clients in React, Next.js, React Native, and Vue.js, styled with Tailwind CSS and Bootstrap.
- Implement secure authentication, role-based authorization, and server-side validation to protect user accounts and preserve data integrity.
- Integrate third-party services including payment gateways, SMS/OTP providers, and media storage, handling webhook verification and transaction reconciliation.

Technical Support Lead | AI Training Workshops — Academic Conferences

Nigeria · 2024

- Led technical support for AI training workshops delivered at major academic conferences, preparing and validating the technical environment for live sessions and demonstrations.
- Served as Technical Support Lead for the 10th SSTE Hybrid International Conference at the Federal University of Technology, Minna, supporting presentation delivery and virtual participation across a hybrid format.
- Served as Technical Coordinator for the 6th International Conference on Innovation at Al-Hikmah University, coordinating technical requirements for workshops on artificial intelligence and technology integration.

SELECTED PROJECTS

Vemre — Freelancer Payments & Remittance Platform · github.com/vemregit

Stack: TypeScript, Node.js, Express, MongoDB/Mongoose, Next.js 15 (App Router), React 19, React Native/Expo, TanStack Query, Tailwind CSS, shadcn/ui, Paystack, Cloudinary, Vercel

Fintech platform enabling freelancers to receive international payments and cash out to Nigerian bank accounts in NGN, with KYC verification, tiered VIP membership, and admin-managed compliance controls. Deployed on Vercel, serving live users.

- Built a Node.js/Express/TypeScript REST API on MongoDB with JWT authentication and Paystack integration for bulk NGN disbursement, including a special-rate payout track with custom fee and holding-period rules.
- Shipped a React Native/Expo mobile application to iOS and Android through EAS build pipelines, covering invoice creation, KYC document capture, and account management.
- Developed a Next.js 15 customer dashboard mirroring the mobile feature set: invoices, transaction ledgers, withdrawals, referrals, and rolling-reserve breakdowns.
- Built an admin panel with granular role-based access control separating system and local administrators, plus a KYC review queue, suspension and appeal workflow, revenue analytics, and bulk payout tooling, alongside a separate Next.js support ticketing application integrated with it.
- Implemented compliance and risk controls: a 25% rolling reserve held for 60 days with administrator release, KYC-gated suspension with a 24-hour appeal window, and a referral and promo-code system with bonus unlocks.

ErrandSort — On-Demand Delivery & Services Marketplace · github.com/vemregit

Stack: TypeScript, Node.js, Express, PostgreSQL, Prisma, Next.js 14, React Native/Expo, Socket.IO, Zustand, Paystack, Twilio, UploadThing, Railway

Multi-role delivery and services marketplace: one shared backend serving five dedicated clients — customer mobile, customer web, admin dashboard, driver app, and vendor app.

- Architected a single Express and PostgreSQL (Prisma) backend serving five separate frontends across mobile and web, with role-based JWT authentication for customers, vendors, drivers, and administrators.
- Implemented real-time order tracking and in-app chat using Socket.IO across both web and mobile clients.
- Integrated Paystack for card and bank checkout with webhook verification, Twilio for OTP-based authentication, and dual file-upload pipelines (multer for mobile, UploadThing for web).
- Built a comprehensive admin dashboard managing vendors, drivers, orders, bookings, logistics, disputes, campaigns, and payouts.
- Deployed the backend to Railway; managed cross-platform state with Zustand and role-based routing via Expo Router and Next.js.

Additional Projects

- **Loan Management System** (Laravel, Vue.js, MySQL) — full loan lifecycle from application to approval and repayment, with role-based permissions for administrators, field officers, and borrowers.
- **Secure Electronic Voting Platform** (Laravel, Tailwind CSS, payment integration) — electronic voting with integrated payment processing and real-time result viewing.
- **School Management System** (Laravel, MySQL, Bootstrap) — student records, attendance, grading, and administrative operations for schools.
- **Analytics Dashboard** (Vue.js, Laravel, REST API) — real-time analytics presented through interactive charts and reporting views.

EDUCATION

B.Sc. Computer Science | Al-Hikmah University

Ilorin, Nigeria · 2022 – 2025

- Core coursework in programming, data structures, and software development; completed academic and practical projects involving web-based systems.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

IBM DevOps and Software Engineering Professional Certificate | IBM via Coursera

15-course certificate in DevOps practice, cloud-native development, and software engineering discipline. ACE® credit-recommended.

DevOps, Delivery and Cloud: Introduction to DevOps; Continuous Integration and Continuous Delivery (CI/CD); Monitoring and Observability for Development and DevOps; DevOps Capstone Project; Introduction to Cloud Computing; Introduction to Containers with Docker, Kubernetes and OpenShift; Application Development using Microservices and Serverless

Software Engineering Practice: Introduction to Software Engineering; Introduction to Agile Development and Scrum; Getting Started with Git and GitHub; Introduction to Test and Behavior Driven Development; Application Security for Developers and DevOps Professionals

Programming and Systems: Hands-on Introduction to Linux Commands and Shell Scripting; Python for Data Science, AI and Development; Developing AI Applications with Python and Flask
